

SABG

Noticeboard

- Our [Autumn 2022 meeting](#) will be in **Autumn 2022**, date to be arranged. [18 April 2022]
- **Newsletter no. 46** (April 2022) is now available. [12 April 2022]

News

- I've been investigating news feeds and have just added a list of our [Recently changed web pages](#) and a section in the [News](#) page showing the most recent messages in the Pacific Bulb Society's "PBS List". [11 April 2022]
- I've just discovered and added the *Bulbinella* book by Pauline L. Perry (1999) **Bulbinella in South Africa** (*Strelitzia* **8**, 78 pp.) to our [Digital library](#) page. Although *Bulbinellas* are not strictly bulbs, they are geophytes (with a "compact corm-like structure") and form a conspicuous element of the flora in many areas of South Africa where true bulbs grow. I'd be interested if anyone has experience with growing them in cultivation in the UK or other areas with similar climate. [1 November 2021]
- I've added Paul Lewis's web-site to our page of [Links to other web sites](#): don't forget to click on "BLOG" at the top of his home page (<https://www.paullewis-plantbreeder.co.uk/>) to see his results breeding *Crocasmia* and *Gladiolus*. It's not a selling page, but you can contact him through the form on his "ABOUT" page to ask how to acquire his plants. [18 October 2021]
- I've added a page on [How to grow South African bulbs](#). Please let me know of any further sources of similar information. [10 September 2021]

SABG Members: are you receiving our emails?

The following emails were sent recently to all SABG members whose email addresses we have. If you are a member and didn't receive any of them, please email Richard White (see "[Contacts](#)" on this page). (If you're not a member and are interested in what we do, see our pages [About the SABG](#) and [How to join the SABG](#).)

- Newsletter no. 46 (two emails, 14 April 2022)
- SABG (Southern African Bulb Group) meeting on Easter Sunday 17th April 2022 (15 March 2022)

Remember that reasons for not receiving our emails include the following:

- You haven't notified us of a change of email address (tell me now!)
- We've made a mistake (these things happen, but tell me anyway!)
- Your inbox is full or your total email quota has been exceeded (download and delete old emails!)
- Your email provider classifies some of our emails as "spam" (look in your "Spam" or "Junk" folder and mark our emails as "not spam"!)

We have recently (on 13 April 2022) made changes intended to reduce the likelihood of our emails being regarded as spam. Please let me know (with a copy of the email) if anything from the SABG (with the SABG's *Lachenalia* logo, rather than from an individual member) ends up in your Spam or Junk email folder. Thank you.

Autumn 2022 meeting

Our next meeting will be in **Autumn 2022**, to be arranged. The timetable below may be adapted as plans develop.

[Directions to the meeting hall](#). The doors will open at 10.00, and the meeting will close at about 14.30.

To be updated!

[→ Read more...](#)

More details of our meetings, including directions for getting there, are given on the [meetings page](#).

Other meetings

- Saturday 16 October 2021: *Nerine* visit day

- Saturday in March 2022: *Lachenalia* visit day
- both organised by the [Nerine and Amaryllid Society](#) at the Five Arrows Gallery, Exbury Gardens, Exbury, Southampton SO45 1AX, subject to whatever restrictions are in place at the time, by kind invitation of Nicholas de Rothschild and Theo Herselman. These events are ONLY open for NAAS members; see the [NAAS events page](#), and please inform Theo or the NAAS Secretary Alison Corley alison.corley@btinternet.com if you wish to attend.

Latest newsletters

- The latest newsletter is [number 46](#) (April 2022). You can read or download all the SABG newsletters from our list of [Newsletters](#).

Further information

- [Help](#) on cultivation, using the web site, etc.
- More information about our meetings, the location and directions are shown on our [About our meetings](#).
- [More information](#) about the Group
- [How to join the SABG](#)
- We have a Google [Calendar](#), so you can add our events to your phone or other device.
- A list of our [Past, present and future meetings](#)
- [Links to other web sites](#) including suppliers of bulbs and seeds
- We have started a [Digital library](#)

Photo gallery

I plan to include a photo gallery here. Until it is ready, why not visit [Audrey Cain's BulbWeb](#)? Her website, now hosted by the SABG, contains over 1,400 photographs of plants in 175 genera (not all of them are South African).

About the Group

The SABG is based in the UK and is for anyone interested in growing the beautiful and diverse bulbous plants of South Africa and neighbouring countries. You do not need to be an expert (I'm not!) or live in the UK, but our meetings have all been in England so far.

The objective of the Southern African Bulb Group is to further the understanding of the cultivation of Southern African bulbs, where 'bulbs' is used in the broad sense to encompass bulb-, corm- and tuber- possessing Southern African plants, which are mostly 'monocots' (plants with strap-like leaves and flower parts in threes or sixes) but also including 'dicots' (with broad leaves and frequently five-petalled flowers) such as *Oxalis*.

Our activities include two meetings per year with talks and plant sales (recently these have been in Winchester in southern England), an annual bulb and seed exchange, and a newsletter with three or four issues per year.

Many of these plants come from the former Cape Province of South Africa, now the Northern, Western and Eastern Cape Provinces, and are easy to grow in a cool greenhouse or a sunny conservatory or window sill. They usually provide colourful flowers in autumn and winter and need a dry period in summer, because they are mostly winter growers from the winter rainfall areas of South Africa. Some are summer growers and a few of these will grow outside in southern or sheltered parts of the UK, such as *Agapanthus*, some *Nerines* and *Tulbaghias*, etc. Others, like *Lachenalia*, are real jewels to brighten up your conservatory when not much else is in flower.
